

SAN FRANCISCO PENINSULA RESEARCH & FORECAST REPORT

Peninsula Market Remains Bullish

OFFICE OVERVIEW

It would be hard to view 2011 as anything but the strongest year for the San Francisco Peninsula commercial real estate market since 2007. Perhaps, though, there will be an asterisk in the record books. A combination of intense leasing activity from select large users and an unprecedented acceleration of a few particularly desirable submarkets have driven the markets into positive territory. What remains to be seen is if activity in these certain segments equate to a broader market improvement.

The office vacancy rate for the greater Peninsula (San Mateo County, Palo Alto, Mountain View, and Los Altos) plunged over the course of 2011 from 16.2 percent to its current 11.4 percent, while San Mateo County shows a similarly dramatic improvement from 17.6 percent to 12.5 percent. In both cases these vacancy rates are the lowest since early 2008.

While the market downturn during the recent recession was defined by an exceptional lack of leasing activity, the recovery to date has been driven by extraordinary levels of absorption. Gross absorption, a measure of all leasing activity, surpassed 7.3 million square feet for the Peninsula, nearly double the 2010 total and 23 percent better than the level seen in 2007, the peak of the last market cycle.

This impressive absorption, however, may not look quite as dramatic under closer scrutiny. Much of this unprecedented activity has been driven by an unusually high number of large users taking down very sizable blocks of space. 2011 saw a total of 19 lease transactions of 50,000 square feet or greater on the Peninsula, compared to only eight in the prior year. The largest office leases seen in both San Mateo and Santa Clara counties played an enormous role in this record year.

MARKET INDICATORS

	Q3 2011	Q4 2011	
VACANCY RATE	13.9%	12.5%	↓
TOTAL VACANCY	4,874,134	4,384,766	↓
GROSS ABSORPTION	1,210,376	1,265,924	↑
NET ABSORPTION	140,975	489,368	↑
WTD AVG ASKING RENT	\$2.82	\$2.95	↑

“2011 saw a total of 19 lease transactions of 50,000 square feet or greater on the Peninsula, compared to only eight in the prior year.”

San Mateo County average asking rates have risen the past five consecutive quarters and vacancy rates have dropped for ten consecutive quarters.

SAN MATEO COUNTY OFFICE HISTORICAL RENT VS VACANCY

Headline-grabbing leases including Facebook, Sony and Google accounted for a disproportionately high share of the activity for the year, but there were a sizable number of other important transactions in 2011. Noteworthy transactions included DreamWorks’ 193,000 square foot lease at Pacific Shores in Redwood City. Perfect Worlds’ 100,000 square foot relocation to Redwood Shores and Box.net’s 90,000 square foot Class A office lease in Los Altos.

At the close of 2010, we predicted that 2011 would bring a shortage of opportunity to accommodate the needs of larger users on the Peninsula. While supply has drastically tightened in this segment of the market, demand has similarly dwindled. Our internal tracking of major users currently seeking space suggests that large use activity will fall off drastically in the coming year. Further rent growth likely depends on the awaited return of the small to mid-size user to the market place.

The growth in average asking rates over the course of 2011 was an impressive 12 percent, with rents closing the year at \$3.19 FS for Peninsula office space. Despite this aggressive one-year spurt, rents are still well below the peaks of 2008, when average asking rates peaked at \$3.64 FS with a comparable vacancy rate to the current quarter. San Mateo County also showed strong rent growth, closing the year at \$2.95 FS. Without the boost provided by the Palo Alto and Mountain View markets (where rents have far surpassed the 2007 peak), the gap between current rents and the top of the last cycle is even more dramatic.

R&D/INDUSTRIAL OVERVIEW

The San Mateo County R&D and industrial markets showed signs of positive activity, not only in the fourth quarter, but for all of 2011. The County’s R&D market posted positive net absorption in each quarter of 2011, bringing the year-end total to 527,430 square feet. 2011 is the first year since 2006 that we have experienced positive net absorption in the R&D market. The County’s industrial market’s fourth quarter net absorption was a positive 155,903 square feet, which contributed to the positive year-end net absorption total of 369,253 square feet. This is very encouraging after the 2009 and 2010 respective totals of 27,115 square feet and negative 1,565,691 square feet of net absorption.

The aggressive market gains seen in highly desirable core markets such as downtown Palo Alto and Mountain View has been one of the focal points in the market recovery over the past 18 months. In perhaps a sign that the multi-tenant market recovery is spreading beyond the rail corridor, Redwood Shores has emerged as the large submarket with the most dramatic improvement to date in this market cycle. Vacancies in this Class A-dominated market have dipped to just 6.5 percent, and average asking rents have risen in 2011 by 15% to \$2.90 fully serviced just over a year.

The County’s R&D vacancy currently stands at 14.9 percent, a 4.6 percentage point decrease from the fourth quarter in 2010. This is the first time the vacancy has dropped below 15 percent since the fourth quarter of 2008. The County’s average asking rate in the first quarter of 2011 rose to \$1.87 NNN, but closed 2011 at \$1.78 NNN, which is consistent with the rates over the past five years. If vacancy levels continue to

*THE SOUTH PENINSULA CITIES OF MOUNTAIN VIEW AND PALO ALTO ARE FOR REFERENCE PURPOSES AS THEY ARE NOT INCLUDED IN THE SAN MATEO COUNTY MARKET TOTALS BELOW.

drop in early 2012, look for asking rates to climb slowly throughout the year.

R&D activity in San Mateo County showed positive signs to end the year. The County's R&D gross absorption in the fourth quarter was 166,301 square feet. Gross absorption for 2011 was 822,843 square feet, which marked the highest total since 2007 when it was 987,429 square feet. Menlo Park was the most active submarket, accounting for 96,221 square feet of gross absorption in the fourth quarter.

**SAN MATEO COUNTY R&D
HISTORICAL RENT VS VACANCY**

The San Mateo County industrial vacancy closed the year at 8.8 percent, which is a slight decrease from 9.7 percent this time last year. Industrial average asking rates have remained stagnant throughout 2011, standing at \$0.77 NNN at the end of the year. Industrial gross absorption was 429,909 square feet bringing the year-end total to 1,264,760 square feet; this is the largest annual gross absorption total since 2008 when it was 1,352,006 square feet. South San Francisco was the most active submarket during the quarter, accounting for 44 percent of the gross absorption total.

The R&D and industrial markets have slowly followed the office markets lead on the Peninsula during 2011. As the Peninsula office market displayed excellent activity during 2011, R&D and industrial markets have also shown positive movement. However, we do not expect the R&D and industrial sector's recovery to be as expedient as the office market; it will be a gradual process that will take time to fully recover. Looking forward to 2012, we expect the R&D and industrial markets absorption to remain consistent with 2011.
